

Advanced DICOM

1 day

Overview

This course aims to teach staff how to analyse and diagnose problems and errors with DICOM systems.

Who should attend?

System implementers, system architects, system designers, consultants, senior radiographers, support engineers and anyone who will work on projects involving DICOM.

Prerequisites

Introduction to DICOM

Objectives

- Identify problems with DICOM sessions and files
- Locate faults in DICOM logs
- Resolve problems with DICOM transmissions

Quizzes and Assessment

The course includes interactive quizzes to consolidate learning and a final assessment to provide reassurance that your staff have achieved the required level of competence.

Further training

- Introduction to HL7
- Integrating the Healthcare Enterprise

Specific requirements

We understand that you may have specific requirements such as:

- Delivery of the course to a specific audience
- Tailoring of the course content
- Delivery of the course at a particular location
- Analysis of the training needs of your staff

Ideal Training wants you to be entirely satisfied with the services we offer and so we are always happy to discuss your needs in detail and to propose solutions.

Course content

This is a practical hands-on course where delegates are given a number of realistic scenarios using DICOM software and utilities and learn how to analyse, diagnose and correct problems with DICOM messages.
